

## Appraiser Update

Welcome to our latest Appraiser Update! We seem to have settled into a new normal around COVID-19, so this edition focuses on some other hot topics like the new 1004 Desktop and the 1004 Hybrid for use in a small number of appraisal reports, as well as clarification on appraising homes with solar panels and energy-efficient improvements. We also share some data on appraisal assignment volume and appraiser workload, reflecting the incredibly busy year appraisers have had. Thank you for taking the time to stay informed.

Your engagement is critical to help inform our ongoing efforts to improve processes, standardize data, and implement technology solutions ... and we love hearing from you! Please continue to use the [Contact Us form for appraisers](#) to share what's on your mind and submit feedback and questions on appraisal topics.
